LEVY PHOTOGRAPHY | INSTANT PORTRAIT STATION

The Premier On-Location Studio for Weddings & Events | 2026 Investment Guide

Serving San Jose and the Greater Bay Area, **Levy Photography** brings a luxury, interactive portrait studio experience directly to your wedding or event, combining professional craftsmanship with real-time AI technology for editorial-grade results delivered instantly.

THE LEVY PHOTOGRAPHY DIFFERENCE

- **Professional Artistry:** Our station is led by an experienced photographer who provides professional direction, ensuring every guest is captured at their absolute best with the skill and eye of a true artist.
- **High-End Studio Standards:** We maintain the highest production values, utilizing professional studio lighting and elite camera systems to ensure every portrait is technically perfect, matching the precision and aesthetic of a private high-end session.
- **Bespoke Stylistic Flexibility:** We offer a versatile creative approach that adapts to your unique vision. Whether you desire a timeless classic look or a bold modern aesthetic, we tailor our technical setup and artistic direction to perfectly complement your event's atmosphere.
- **Signature Workflow & Instant Delivery:** Our real-time process delivers studio-quality results onsite. Guests receive their professional portraits during the event, eliminating the standard wait of days or weeks for finished results.
- **The Gift of Memories:** Your guests walk away with an editorial-grade portrait—a lasting gift that typically requires a significantly higher investment for a standalone private session.

1. INVESTMENT OVERVIEW

A summary of packages and hourly extensions for easy reference.

- **25–75 Miles: $4.00 per mile** applied to mileage exceeding the initial 25-mile radius.
- **Beyond 75 Miles: Custom Quote**. Contact us for tailored travel and lodging rates.

FREQUENTLY ASKED QUESTIONS

For the Host & Event Planner

1. What are the space and power requirements? We typically require a 10'x10' footprint and access to a standard 15-amp power outlet. To house our high-speed printer and technical equipment, we also require one sturdy 6ft or 8ft draped table to be provided by the venue or host. If the event is outdoors or in a remote location, please let us know so we can coordinate power solutions.

2. What kind of equipment do you use? We utilize a full studio-grade production stack to ensure the highest reliability and image quality.

Component	Equipment Details
Cameras	Professional High-Resolution Mirrorless Systems
Lighting	Professional Studio Strobes with Large Softbox Modifiers
Printing	DNP DS40 High-Speed Dye-Sublimation (Archive Quality)
Connectivity	Dual-Path 5G Hotspots + Starlink Satellite Terminals
Retouching	Real-time Dedicated GPU Servers for AI Enhancement

3. Do you have insurance and backup equipment? Yes. We operate with a "Zero-Failure" philosophy. We carry redundant backups for every critical component of our station—including backup camera bodies, lenses, studio lighting, and secondary printing units. Additionally, Levy Photography is **fully insured** with general liability coverage. We are happy to provide a Certificate of Insurance (COI) to your venue upon request.

4. What if my venue has no cell service or Wi-Fi? This is where we excel. We bring our own high-speed 5G hotspots and Starlink satellite terminals to ensure 100% connectivity, regardless of the venue's infrastructure. We ensure your guests receive their photos even in the most remote locations.

5. How much time do you need for setup and teardown? Our team arrives 60 to 90 minutes prior to the scheduled start time to ensure lighting is calibrated and the network is stable. Teardown typically takes 45 minutes. This setup time is included and does not count toward your hours of coverage.

6. Will the host receive a master gallery of all images? Absolutely. While guests receive their individual photos instantly, the host will be provided with a link to a full master gallery containing every portrait taken during the event within 48 hours of the conclusion.

7. Can we add a custom logo or event watermark to the photos? Yes. We can design a bespoke, elegant overlay or "digital mat" featuring your event logo, date, or monogram to ensure every portrait serves as a branded keepsake of your celebration.

8. Do you provide a backdrop? Yes. A professional-grade solid backdrop (Studio White, Slate Grey, or Deep Black) can be included upon request. However, for a truly bespoke look, we love collaborating with your florist or event designer to photograph guests against custom floral installs or venue-specific decor.

9. Do you provide props? Absolutely! We believe high-end shouldn't be boring. We provide a curated selection of high-quality props tailored to your vision. Whether you want sophisticated accessories or fun, themed items, we are happy to coordinate the right props for your event or incorporate any unique items or furniture your team provides.

For Your Guests

1. How do guests find their photos? We use a seamless AI-powered registration. Guests simply scan a QR code provided at the station and take a quick "check-in selfie" on their device. Our system then uses facial recognition to instantly organize their private gallery containing only their photos.

2. How fast do guests receive their photos? For the **Base Package**, digital delivery is near-instant (20–40 seconds). For sessions including **Standard Onsite Editing** or **AI Retouching**, we prioritize quality—delivering final, professionally polished portraits to the gallery within 15–20 minutes.

3. Are the private guest galleries secure? Yes. Our AI facial recognition ensures that each guest only sees the photos they appear in. We prioritize privacy while making the experience frictionless and magical.

4. Can guests share their portraits directly to social media? Yes! The custom gallery allows for one-click downloading and sharing to Instagram, Facebook, or via text and email, allowing guests to show off their professional portraits in real-time.

5. How does the AI Retouching work? Our "Vogue Upgrade" uses a dedicated server to apply editorial-grade retouching (skin smoothing, eye enhancement, and blemish removal) to every photo in real-time, ensuring guests look their absolute best.

6. How do guests get their physical prints? If the host has included Onsite Dye-Sub Printing, guests can simply select their favorite portrait from their private digital gallery and tap the "Print" button. High-quality 4x6 prints will be sent to our station and ready for pickup in seconds.
